

Newport[®] lite™

The new Newport lite hip orthosis from Orthomerica is designed to provide protection and support for patients at risk for problems related to hip instability.

Indications

- Arthroscopic hip procedures
- Labral repair, with or without gluteus medius repair
- Post-op proximal hamstring repair
- Patients at risk to dislocate

Contraindications

- Global instability
- Patients at risk for an anterior dislocation
- Chronic dislocation

Features/Benefits

- Protects the hip joint capsule by providing a limited and safe range of motion following surgical procedures
- Well-tolerated by patients
- Virtual joint is easily set to control hip flexion, extension, adduction and abduction
- Proprioceptive reminder
- Universal for right or left side
- Easily customized to provide an exact fit
- One size fits most
- Laterally placed abduction paddle helps to maintain the head of the femur in the acetabulum
- Compression belt design with pull tabs anchors the hip joint and thigh cuff to promote optimal alignment
- Accommodates hip development through ball joint mechanism

Newport[®] lite™ Hip Orthosis one size fits most waists 26"–66" (66cm–167cm)

Item	Model #
Complete Orthosis	3662
Abduction Control Joint	3662.03
Pelvic Component	3662.04
Replacement Pad Kit	3662.05

The **Newport 3 Hip Orthosis** has been the industry standard for over a decade. Innovations like the patented clamping disks, allowing precise contouring of the pelvic section and the Universal Virtual Joint, which provides unprecedented strength in a small component, have made the Newport Hip Orthosis the most popular choice for physicians, orthotists, and patients, worldwide.

Indications

- Post-operative hip revision patients
- Primary arthroplasty patients at risk to dislocate
- Patients needing stability after dislocation
- Inoperable patients requiring hip stabilization
- Patients who can benefit from a hip orthosis to reinforce hip precautions

Unisex Pelvic Component

- Male/Female adjustability with unique patented disk technology
- Single-push click'n close fastener for simple donning and doffing, Chafe and loop also available

Virtual Hip Joint

- Abduction, adduction, flexion, extension adjustments

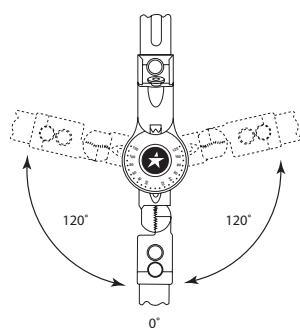

Optional, unilateral ARC™ (Anti-Rotation Cable) is available.

- Infinite adjustment of internal/external rotation
- Modular—fits all Newport® Hip Systems
- Washable, CoolFoam™ liner

Model # 3768.02A
(Please specify size)

The **Newport 3 Pelvic Component** of the orthosis can be rapidly adjusted for both hip circumference and hip development while the patient is wearing the orthosis. The unique pivotal design allows components to move freely during the fitting process. Once the optimum position has been determined, the components are locked into place by tightening the two locking discs using the special Allen wrench provided with each orthosis. Available in side-specific or universal models. CoolFoam™ liner provided.

Newport 4[®] HIP SYSTEM

The totally modular and patented **Newport 4 Hip Orthosis** has been designed and engineered to provide the most comfortable hip orthosis for your patients with innovative new options to increase function and control.

- Low-profile design to improve patient comfort and compliance
- Padded posterior section for enhanced comfort and improved lordotic fit
- No proximal/medial plastic on thigh component to interfere with hygiene
- Thigh component design adjusts with clamping disc to accommodate varying shapes and to prevent knee flexion impingement
- Preset, quick release closures ensure same fit each time
- Patented clamping technology on pelvic band adjusts to male or female anatomy and a wide range of circumferences
- Universal pelvic design fits right and left to reduce inventory
- Also available with universal style thigh cuff

Indications

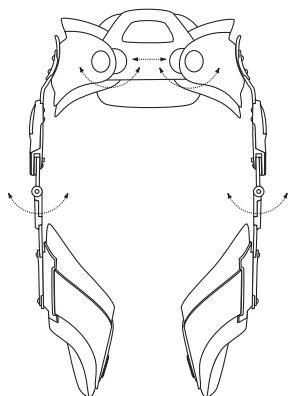

- Post-op hip revision patients
- Primary arthroplasty patients at risk to dislocate, (e.g., patients with congenital hip dysplasia or spastic/tight adductors)
- As a prophylaxis to reinforce hip precautions
- Inoperable hip patients at risk

V5 Joint The Virtual 5 Joint from Orthomerica was engineered to be the most versatile design for the Newport 4 Hip System. This joint can precisely fit all your entire patient population.

- Small joint head and lightweight design without sacrificing strength
- Easy access to all joint adjustments that are made with Allen wrenches
- Multiple bar choices allow the practitioner to position each component and hip joint more precisely for very short to very tall patients
- V5 Joint can fit all patient heights including those less than 5'2" and over 6' tall
- Available in standard and extended curved proximal bars
- Available in 2, 3, and 4-slot distal bars for optimal placement of the thigh component
- The Newport 4 is an extremely versatile orthosis. The V5 Joint complements the wide range of thigh cuff options and patient diversity. Select your favorite thigh component to find the perfect V5 Joint for your patients

Requires extended joint.

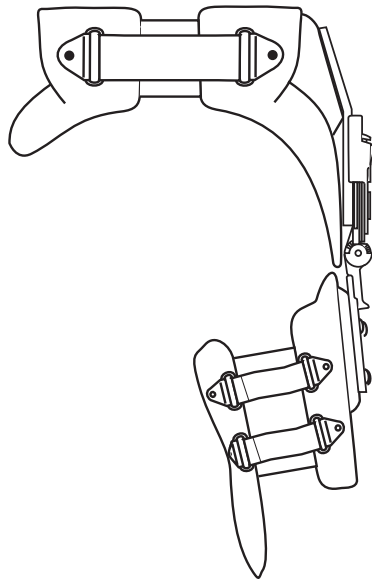

Newport® MC Designed for more involved post-operative hip patients, this pre-fabricated, modified body jacket version of the Newport Hip Orthosis enables the orthopaedic professional to stock certain sizes for immediate fitting. Eliminates overnight shipping charges. Especially effective for patients prone to chronic dislocation due to involved total hip revision.

- Comfortable, positive control of adduction/flexion/extension
- Improved biomechanics with high contralateral extension
- Unique locking feature to keep pelvic section level

Available custom-to-measurements. For thigh sizing reference NP3 chart on page 26.

Newport® ARC™ Kit The ARC kit is an optional, modular component designed to maintain the affected limb in either internal or external rotation. It is indicated for primary or revision total hip arthroplasty patients at risk to dislocate in an anterior or posterior direction. The ARC can be retrofitted on any adult Newport System.

Size	Model #		Knee Center to Floor	Shoe Size
	Left	Right		
Short	3670	3673	15"	Men 5-7 Women 6 or less
Medium	3671	3674	17"	Men 7½-10 Women 6½ up

X-Long	3672X	3675X	21"	Men 10½-13
XX-Long	3672XX	3675XX	22"-25"	Men 10½-13

Any shoe size can be substituted at no additional charge.

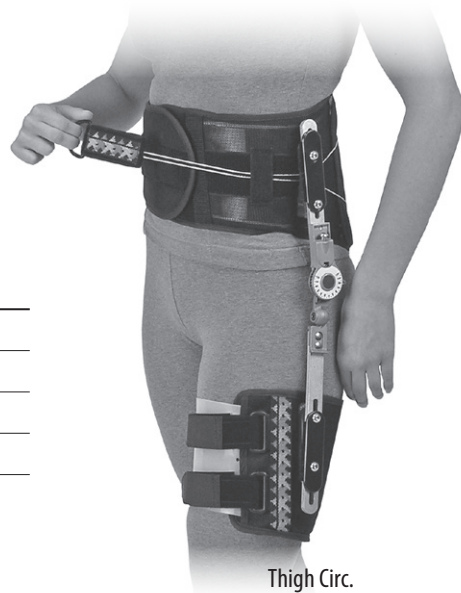

Fits all adult Newport Hip Systems and includes External Stirrup and Heel Cup Shoe Insert.

PRAFO® Shoe Option The PRAFO option is indicated for hospital or homebound patients prone to heel skin breakdown. The PRAFO elevates the heel and can be removed for daytime ambulation. Knee center to floor measurements are needed for this custom-to-measurement orthosis. All PRAFO Shoe Options include a Newport ARC Kit. Not sold separately.

Model # **3676** (Please specify right or left when ordering.)

PRAFO® (Pressure Relief Ankle Foot Orthosis) is a registered trademark of Anatomical Concepts, Inc.

The **California Hip Orthosis** is the latest innovation in Orthomerica's leading hip orthosis designs which helps to prevent dislocation. The California Hip Orthosis was created to facilitate the best pelvic and thigh control and minimize the bulk of conventional hip orthoses for patients at risk to dislocate.

Features

- Comfortable, total-contact reinforced mesh pelvic component based on the popular California Compression Orthosis supports the back and aligns pelvis and hip joint
- Universal pelvic, thigh and hip joint components reduce inventory and make stocking all sizes more cost efficient
- Hip joint settings provide a strong flexion/extension stop with mild, adjustable resistance to adduction
- Patient-adjustable abdominal compression to increase comfort during activities of daily living
- Abduction wedge regulates the clearance of the hip joint over the trochanter and incision site

Standard Hip Joint Kit—Model # **3955.01**

Newport® jr Pediatric Hip Orthosis The Newport jr Hip System with the new pj—Virtual Pediatric Joint enhances hip stability by supporting and positioning the hips in optimal alignment while allowing controlled range of motion. This pediatric hip orthosis can be used post-operatively to maintain the corrected surgical position, or can be provided to maximize function during activities of daily living. Improved alignment through the hip encourages appropriate acetabular and femoral modeling, and reduces the tendency for subluxation and dislocation.

Indications

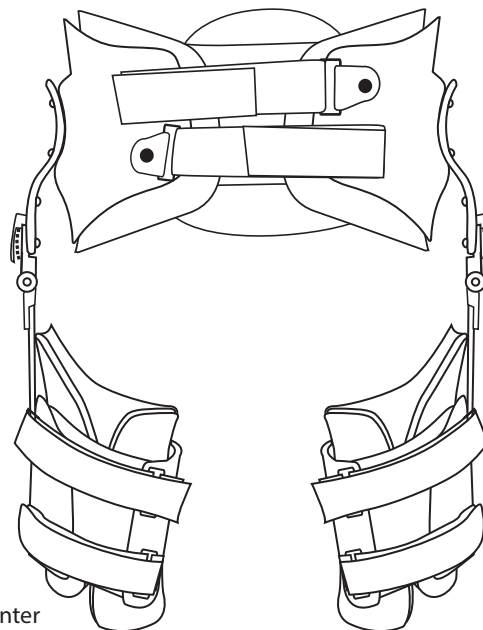

- Post-operative stabilization of the pediatric hip
- Patients with subluxed hips who require better alignment to relieve pain
- Children needing improved sitting and standing balance

Features

- Universal pelvic module, bilateral thigh cuffs, comfortable lumbar pad
- Anatomical design captures and stabilizes the pelvis
- Washable Coolfoam™ liners
- Available in five sizes

Virtual® Pediatric Joint (pj)

- The smallest and lightest hip joint available in the industry
- Adjustable control of flexion, extension, abduction and adduction
- Curved proximal joint attachments provide clearance over the incision and trochanter
- Joints with straight bars available in short, long and unslotted configurations for sale as components

Pediatric Hip Abduction Splints Maintains concentric reduction of hips in patients with hip dysplasia. Replaces spica casts and harnesses for certain neuromuscular and developmental dysplasia patients. One piece polypropylene orthosis holds infant in 90° hip flexion and 60° abduction, adjustable model offers easily adjustable abduction from 40° through 180° by aluminum slotted screw assembly. Fits infants from 3 months (6-12 lbs.) to 18 months (over 30 lbs). Indicated for infants and young children with subluxed hips or to prevent subluxation and dislocation.
